

Urschel® Model JKH

Julienne Knife Honer

OPERATING PRINCIPLE

The knife to be sharpened is held firmly with the back of the knife against the work rest. The slicing edge of the knife is sharpened across the grinding wheel with a steady, rapid movement back and forth maintaining light contact with wheel. The julienne tabs of the knives are sharpened through repositioning the knife so that each tab being sharpened is held firmly against the work rest and moved smoothly and rapidly in the same manner.

SPECIFICATIONS

Length: 12" (305 mm)
Width: 11" (280 mm)
Height: 7" (178 mm)
Net Weight: 25 lb (11 kg)
Motor: 1/6 HP (.13 kW)

APPLICATIONS

The Urschel Model JKH Honing Machine is designed to sharpen the slicing knife edge and individual tabs on julienne knives spaced 3/4" (19 mm) and greater that are used on the TranSlicer 2000® and TranSlicer 2500® Cutters with the least effort and cost.
